

CARING FOR YOUR COMMUNITY

Getting tested for COVID-19 can help protect public health and help open our economy

Asymptomatic COVID-19 positive persons can spread the virus, impacting the health of coworkers and family members, and keeping Sonoma County in the most restrictive purple tier. If we cannot move out of this tier, some businesses and activities will remain closed or otherwise restricted. **You can help!**

SCHEDULE appointments to get tested on a monthly or even weekly basis. Ongoing, County-sponsored testing is available for FREE at Bluebird Community Center in Windsor and other locations. Some residents may be eligible for financial assistance for properly quarantining. For testing at pop-up sites, the County is offering gift cards of up to \$30 per employee to help offset costs of lost wages and transportation.

SHARE information about testing with your friends, family, and coworkers. The more people who test often, the quicker Sonoma County can re-open!
